INTERMEZZO #5

SEMINAR:

Inhabiting Water [Venice]

Unit 1B addresses water as one of the essential ground conditions for the built environment – with the point of departure from the city of Venice. The seminar attempts to unfold Venice as a cultural construct; through its architecture, architects and artistic work – uncovering dynamic relationships to an unstable, changing environment.

The seminar is the point of departure for a two-day workshop at the unit, organised by Karianne Halse (PhD fellow) in collaboration with Unit 1B.

STUDSGADE AUDITORIUM
WEDNESDAY 20-02-2019

09.00
