

Invitation: Workshop and networking

# Imagining a city free from freeways

**An afternoon of discussions on the future of mobility, healthy communities and urban planning.**

Cars have defined urban planning for decades. Cities around the world have carved up their urban fabric to accommodate car traffic, bringing consequences like pollution and fractured neighborhoods.

As alternative transit gains more popularity, we still must face the car's legacy on our urban landscapes. How can we transform old infrastructure into more livable spaces?

On Tuesday, October 9<sup>th</sup>, we invite you to join fellow C40-delegates, city officials, global industry pioneers, and thought leaders for a workshop and networking session focusing on solutions for transforming mobility in cities.

## Preliminary program

<b>4 - 4.15pm</b>	Registration
<b>4.15 - 4.30pm</b>	Welcome
<b>4.30 - 6pm</b>	Inspirational talks and workshop
<b>6 - 6.30pm</b>	Networking
