

Research ex

Project: Experiments in Design+Research
- an experimental book project...

Program: Experimenting to learn? Experiments for knowledge production? Building on prior research, the project aims to contribute with understandings of experiments and experimenting in design (research) - particularly within (co)design programs. The approach combines literature studies, visualizing, experimental writing, and experimental, collaborative, (meta)reflective set-ups with various stakeholders. The main intended outcomes are conceptual clarity and a variety of examples. The main targetgroup is design researchers applying a research-through-design or practice-based approach; but also students, professionals etc. with interest in experimental design practices.

Primary contact person(s): Mette Agger Eriksen; Ph.d. Associate Prof.
Collaborators: Anne Louise Bang, VIA College; Eva Brandt, Designskolen Kolding; Laura Popplow, Köln International School of Design; PhD student, other students, colleagues and potentially external stakeholders
