Academic courses and collaborations Kadk

Resilience & re-industrialization. Collaboration with municipality of Rødovre and Bornholms 2016-17

Atmosphere and Critical Regionalism. Collaboration with the municipality of Lejre 2015-16

Teaching and workshop in collaboration with Velux guestprofessor Olav Kristoffersen (Brendeland&Kristoffersen) 2016

Metabolisme and strategies for reuse. Collaboration with municipality of Næstved 2014-15

Spaces for "formation" - Collaboration with municipality of Copenhagen 2013

Workshop DAC & Henning Larsen - "In dialogue with the world 2013"

Transformation of the Urban periphery. Collaboration with the municipality of Copenhagen 2012

Robustness and resources, Ørestad Syd 2012

Teaching and workshop in collaboration with Velux guestprofessor Bijoy Jain (Studio Mumbai) 2012

Course on Integrated energidesign in collaboration with Denmark's Technical University 2012

Teaching and workshop in collaboration with Reiulf Ramstad 2012

Nature and biodiversity in building 2011

Workshop with José Luis Vallejo (Ecosistema Urbano) 2011

Workshops in collaboration with Philippe Vassal 2011 (Lacaton&Vassal)

Teaching and workshops in collaboration with Velux guestprofessor Philippe Rahm 2009

Selected prizes and distinction of student projects that I have tutored

Thesis project; "Neste stasjon", New train Station for Hamar by Jon Grasdøl og Anton Boman.

Vola Grant 2018. Link

"Neste stasjon" undersøker hvordan stasjonen kan bidra til å utviske jernbanens barrierevirkning og skape gode lokale forbindelser mellom transport, urbanitet og natur.(Grasdøl & Boman)

Thesis project; "Vestlandet - A framework for circular economy" by Gustav Jerlvall Jeppsson og Fredrik Walentin Sandbu.

Kadk UN price 2017. Link

"Prosjektet er et bud på hvordan man kan bidra til å omstille et samfunn fra en lineær til en mer sirkulær økonomi. Det skaper arkitektoniske og strategiske rammer for en fremtidig sirkulær industri, og gjennom dette viser en mulig retning for et Norge i en tid etter olje-alderen" (Jeppsson & Sandbu)

Thesis project; "A study in densification of Oslo" by Sebastian Fjellingsdal Berg & Magnus Hellum. Link

"At politikere med press på seg for å møte en økende boligmangel og kommersielle utbyggere som vil bygge mest mulig, har gitt Oslo mange arealeffektive, identitetsløse anlegg som ikke gir noe til omgivelsene. Det sosiale liv er nedprioritert. Gode planløsninger og lysforhold er blitt mindre viktig". (Arkitekter: Slik kan Oslo fortettes uten å viske ut byens historie. Omtale i Aftenposten 28 juni 2016)

Thesis project; "The Body Architectonic: A Health Cluster in Hackney" by Lea Olson. Wallpaper Graduate Directory 2015 and International Velux Award 2014.

"A project, which sets out proposals for various lighting constellations in treatment and therapy environments for health care in the future. Her focus was on the relationship between light, the human body and architecture" (kadk.dk)

Thesis project; "Det tabte land" by Anders Liisberg-Larsen. Vinder of The Icopal prize 2013 and The Vola Grant 2013. Link

"På forbilledlig vis anviser projektet, hvordan et arkitektonisk, landskabeligt og klimatilpasset helhedsbegreb kan transformere eksisterende forhold i det danske landskab og øge dets rekreative værdi" (arkitektforeningen.dk)
